SSTV Event Planned for Late December

ARISS is planning an SSTV event featuring commemorative images. This event is currently scheduled to begin on December 28, 2019 at 11:00 UTC and ends at 18:20 UTC on January 1, 2020. Please make note that sometimes changes may occur in the crew work schedule that could affect our SSTV transmission dates and times, so frequently check our ARISS Facebook and Twitter accounts shown below for any updates before and throughout the event.

Transmissions will be sent at 145.800 MHz FM in the SSTV mode PD-120. Once received, images can be posted and viewed by the public at http://www.spaceflightsoftware.com/ARISS_SSTV/index.php and you can receive a special SSTV ARISS Award for posting your image. See <https://ariss.pzk.org.pl/sstv/> for details. Also for simplicity, we have added a new information tab for SSTV events, under the General Contacts pulldown menu at www.ariss.org.

About ARISS:

Amateur Radio on the International Space Station (ARISS) is a cooperative venture of international amateur radio societies and the space agencies that support the International Space Station (ISS). In the United States, sponsors are the Radio Amateur Satellite Corporation (AMSAT), the American Radio Relay League (ARRL), the ISS National Lab and National Aeronautics and Space Administration (NASA). The primary goal of ARISS is to promote exploration of science, technology, engineering, and mathematics (STEM) topics by organizing scheduled contacts via amateur radio between crew members aboard the ISS and students in classrooms or public forms. Before and during these radio contacts, students, educators, parents, and communities learn about space, space technologies, and amateur radio. For more information, see www.ariss.org.
